

DATASHEET

LFABP Mouse Monoclonal Antibody (ARM629)

CAT. NO. ARM6920

KEY FEATURES

Target	LFABP	Clone ID	ARM629
Source / Host	Mouse	Reactivity	Human
Applications	IHC	Dilution	1:50-1:200
Clonality	Monoclonal	Storage	-20°C

BACKGROUND

Liver Fatty Acid Binding Protein (LFABP), also called FABP1, is a 14 kDa protein that comprises 2-11% of the cytosolic protein of normal hepatocytes. It is also expressed in tubular kidney cells, the aveolar epithelium of the lung and intestinal tissue. LFABP is utilized for classification of hepatic adenomas.

APPLICATION

To ensure optimal assay performance, AREX recommends conducting reagent titration tailored to each testing system for optimal detection results.

Application	IHC
Dilution Ratio	1:50-1:200

*Results are sample-specific. Please refer to your local assay conditions and test parameters for reference.

PRODUCT OVERVIEW

Antibody Type	Primary antibodies
Isotype	IgG
Positive Control	Liver
Localization	
Form / Buffer	Tris Buffer, pH 7.3 - 7.7, with 1% BSA and <0.1% Sodium Azide
Purification	Purified
Conjugation	Unconjugated
Gene Symbol	FABP1
Entrez Gene ID	2168
Uniprot	P07148
Alternative Names	Liver-type fatty acid-binding protein, FABP1

*AREX continuously optimizes our products. Webpage content may not reflect the latest updates. For inquiries, please contact info@arexbio.com or your local distributor.

*Clone Number, Reactivity, Source/Host and Clonality can be found in the product name and Key Features section above.

DATASHEET**LFABP Mouse Monoclonal Antibody (ARM629)**

CAT. NO. ARM6920

STORAGE

Store at 4°C short term. For long term storage, store at -20°C, avoiding freeze/thaw cycles.

DATA

Immunohistochemical staining of human hepatocellular carcinoma tissue sections using LFABP Mouse Monoclonal Antibody (ARM629).

RESEARCH USE ONLY

For Research Use Only. Not for diagnostic, therapeutics, prophylactic or in vivo use.
